Time Series & Table Data

DevOps

PROFILE

Looking for PhD opportunities or/and inspiring project with really large scale.

EMPLOYMENT HISTORY

Senior DS, OCRV

Adler, Russia

Dec 2018 — Present

Full-time job. My current work at R&D center of OCRV/RZD is about research in the interests of railway industry: Predictive Analytics, Object Detection, Image/Text/Audio Classification, Regression analysis, Uplift, NER, Image/Text Clustering, Video Tracking, Text Recognition, Training Embedders. Also I am industry mentor for talented students of Sirius.

Here I got strong hard skills of research CV, NLP, TS, DL and became Kaggle GrandMaster.

DS, Angry Developers LLC

Moscow, Russia

Apr 2017 — Feb 2019

Full-time job. My work at Angry Developers LLC was about developing of Virtual Assistant for small business. It is small team with strong knowledge of NLP and DL. I took part as implementer of machine learning algorithms with text: clustering, classification, entity recognition, ranging by relevance, embedders. Also I took part as developer of machine learning microservices (ETL, Inference, Model Serving, Python, Flask, Django, Async Python, Aiohttp, PSQl, MongoDB) and some DevOps tasks (CI/CD, Docker, Nginx, Releasing).

I got strong hard skills of implementing NLP tasks, developing ML microservices and DevOps. Also I got useful skills of time management and understanding culture of code developing.

Junior Researcher, JIHT RAS

Moscow, Russia

Oct 2016 — Jul 2018

Part-time job. My research at Joint Institute for High Temperatures of the Russian Academy of Sciences was about influence of dust particles on the neon spectral line intensities at the uniform positive column of dc discharge at the cosmic space micro-gravity. I developed ETL

HOBBIES

Snowboarding, surfing,
kitesurfing, wakeboarding,
skateboarding, skating,
workout, swimming, travelling,
IT, chess, guitar, investment,
eSport, archery, kaggle

LANGUAGES

Russian

English

processes, scripts for processing unique data from the space apparatus "Plasma Kristall-4" (text logs and images ~1Tb) and exploratory data analysis.

I got useful skills of finding patterns and features in large corpus of texts and images; preparing papers using LaTeX.

Junior Analyst, MIPT

Dolgoprudnyy,
Russia

Jun 2016 — May 2017

Full-time job. In Moscow Institute of Physics and Technology I got first serious work with data. My tasks were analyzing of technologies of startups, research market, collecting and visualizing of data.

I got useful skills of searching information and basic programming skills.

Junior Researcher, ISAN

Troitsk, Russia

Sep 2014 — Jun 2016

Part-time job. My research at Institute of Spectroscopy of the Russian Academy of Sciences was about emission spectroscopy of molecular H₂O in Neon Lamp. I participated in creating universal calibration system for emission spectroscopy devices with easy usage.

I got useful skills of creating prototypes in research stage.

Tutor, repetitors.info

Moscow, Russia

Nov 2012 — Jul 2016

Part-time job. I gave Olympiad mathematics and physics lessons and also helped students to prepare for exams.

Working as a tutor, I got useful skills of teaching other people.

EDUCATION

Bachelor & Master of Science, MIPT

Dolgoprudnyy,
Russia

2012 — 2018

Lyceum Student, SESC UFU

Ekaterinburg,
Russia

2009 — 2012
